Kangaroo Island

South Australia

VACANT **MINISTRY POSITION**

The Anglican Diocese of Adelaide and Bush Church Aid seek an ordained Anglican minister for a fully stipended position which includes accommodation.

Kangaroo Island is the third largest island 13 kms off the coast of South Australia. It has a population of around 4700. The main industries are tourism, agriculture and cottage industries.

Why consider **Kangaroo Island**?

- The church has made strong community inroads through *mainly music* and its involvement in the school community. The church's weekly family service has seen significant ministry growth with a focus on reaching out to others.
- At present no other denomination has a permanent minister on the Island so there is pastoral need but also missional opportunities.
- A full-time minister on the Island will allow a Christian voice in the community, especially in the local school and in social services.
- The minister gains a public face through event such as ANZAC Day services, funerals, Christmas Carols and people regularly approach the Minister at the local shops to begin conversations and ask questions.
- A three-bedroom rectory is located across the road from the church in Kingscote.
- The minister has good support from the congregation. Penneshaw and Kingscote have a Priest's Warden and People's Warden each plus a couple of other Parish Council representatives from each centre.
- As BCA Field Staff are sent in partnership with the diocese, you will be part of a cohort of fellow gospel workers around Australia, supported by one of the largest prayer support networks in Australia, and the generous and encouraging BCA community.

Kangaroo Island

South Australia

About Kangaroo Island

- Kangaroo Island is a precious gem of God's creation, known as one of the world's best nature-based destinations. It has more than 500 kilometres of stunning coastline and beaches, nearly half its landscape is development-free and it is home to extraordinary wildlife.
- The Island boasts many plants and animals not found anywhere else in the world. There are over 850 native plants on Kangaroo Island. As there are no rabbits and foxes on the Island, it is a natural habitat for platypus, goanna, glossy black cockatoo, albatross, seals, penguins, the leafy-sea dragon and the Island's own species of kangaroo.
- Kangaroo Island has five sports clubs for its 4700 people. Those clubs play AFL and netball through winter and most of them play cricket, basketball, softball and tennis in summer. There is also a yacht club, a walking club, a pony club and a dragon boating club to name just a few. For swimmers, there is the Kingscote tidal pool.
- Kangaroo Island has a multi-campus school with campuses at Kingscote, Parndana and Penneshaw which links childcare, preschool and school education to promote lifelong learning.
- Kingscote, the largest town on the Island, has the main Hospital which provides a wide variety of services, including emergency, mental health and maternity. A private medical practice also works closely with the Hospital.
